

Initial Build Notes

Creative Director: Campbell Oh

Designer: Sophie Difazio

Notes:

- Make the homepage background gradient pink to white, Make the text black.
- Make other pages have a dark background and light text.
- Put the source in the footer rather than a separate page.
- Placeholder responsive page; had a question about what to do about the navigation bar. I think leaving the navigation bar as it is on the mobile page is alright, but if it feels too cluttered, you could put three subpages on each line.
- Look over possible font choices; send pictures of the ones you had in mind.
